

AP LANGUAGE AND COMPOSITION

FALL SEMESTER 2020

Essay Outline for Rhetorics 8.24

Question:

Do we agree/disagree with serving milk and school cafeterias.

Claim: After reading *Milk Nutrition* by the Midwest Dairy Association and Jaime Olivers video on *Sugar Overload* I agree with serving flavored milk and school cafeterias.

Reason #1: There is more variety for children who do not like regular milk.

Evidence:

- Example piece of evidence: **Children** are more likely to get their three daily servings if **flavored milk** is an option. (p.5)
- In schools, 70 percent of **milk kids** choose is **flavored**, low-fat **chocolate** being the most popular choice. (p.6)
- Has more muscle-building protein than juices and sodas. The vitamins and minerals help build and repair muscle, making it a great post-exercise beverage and a **healthy** alternative to sports drinks. (p.14)

Then... Repeat for how many reasons you want to include!

You got this!
